

Business Reporting & Intelligence Associate Assessment

You have been hired as a Business Intelligence Associate to help the company make more data-driven business decisions about its people, products and customers. Using the data attached, you would be required to prepare and submit the following.

- A report: a Powerpoint presentation with actionable insights from the data and strategic recommendations to management (4-5pages)
- Workings: present your workings by sending in the analysed excel sheet used for the report presentation
- Prepare an interactive Power BI Dashboard showing all the key insights and send in screenshot(s) with your report

** Please note that you would be required to present and walk us through the Power BI dashboard and excel sheet used to analyze the data during the technical interview.*
